Unpack the box

1. Remove the components and TV from the box. Save the packing materials in case you need them later.
2. Remove the documentation for important information.

Notice

- **Subject to Change**: Product specifications, configurations, prices, system/components/options availability are all subject to change without notice.

Check the components

Your TV comes with:
- Remote control and batteries
- Several documents, including the Resource Guide, and Standard Limited Warranty
- Pedestal stand and hardware
- All other cables and adapters are sold separately.
- If any items are missing or damaged, notify your dealer immediately.

Choosing a location for your LED TV

To display your TV on the included Pedestal Stand:

1. Read and follow the pedestal assembly instructions section in this document.
2. Before beginning pedestal assembly, carefully lay the TV face down on a soft, flat surface such as a quilt or blanket. Leave the bottom of the unit protruding over the edge of the surface and assemble the pedestal as indicated below.

Caution:

- Extreme care should always be used when attaching or removing the pedestal stand to avoid damage to the LCD panel.

Pedestal Assembly Instructions

**CAUTION**

To prevent possible electric shock, protect the power cord from being pinched when attaching the pedestal stand.

Extreme care should always be used when attaching the pedestal stand to avoid damage to the LCD panel.

- For Canada, the terms and conditions of the Limited One (1) Year Warranty on Parts and Labor can be found at www.toshiba.ca/support.

**NOTICE**

A High-Definition signal is needed to receive a High-Definition picture. Once you have a High-Definition signal you need to connect it to a High-Definition input on your TV. Not all channels are currently broadcasting in HD. Standard analog TV channels and HD channels, even on the same network, broadcast on different frequencies. (Example: ABC analog may be on channel 4, while ABC-HD may be on channel 104.)

Register Your Toshiba Television

Enhance your ownership experience by taking a few minutes to register your Toshiba product at register.toshiba.com (for L1400U and L1400UM series) or support.toshiba.com (for L1400UC series). Completing product registration allows Toshiba to provide you with product information updates, special offers and promotions. Failure to complete product registration will not diminish your rights under the Standard Limited Warranty.

Please Do The Following Before Returning This Product To The Store.

If you are experiencing a technical problem or have questions regarding operation, authorized service centers, warranty or parts, please contact our Customer Support Center at:

**NOTICE**

A High-Definition signal is needed to receive a High-Definition picture. Once you have a High-Definition signal you need to connect it to a High-Definition input on your TV. Not all channels are currently broadcasting in HD. Standard analog TV channels and HD channels, even on the same network, broadcast on different frequencies. (Example: ABC analog may be on channel 4, while ABC-HD may be on channel 104.)
Receiving an HDTV Signal

There are three basic ways to receive an HDTV signal on your new TV:
1. Over-the-Air (Antenna)
   Connect a high quality outside antenna (not supplied) directly to the antenna input on the back of the TV. (Reception cannot be guaranteed and is based on proximity to the local signal).
2. Cable or Phone Company HDTV Service
   Cable or phone company HDTV service customers will need to subscribe to High-Definition service from your local provider. (Additional monthly subscription cost may apply).
3. Satellite
   Satellite customers will need a High-Definition satellite receiver and appropriate dish hardware. (Additional monthly subscription cost may apply).

Connecting to a High-Definition Input on your TV

You can connect directly from an antenna, or if you are using an HD cable box or HD satellite box, there are three standard connections that can be used to receive an HD signal.

1. Antenna Input
   To connect directly from an antenna or basic cable, connect the cable directly to the antenna input on the back of the TV.

2. HDMI® to HDMI®
   HDMI® is the best connection for HDTV. This is a digital connection that carries both digital video and digital audio.

3. DVI to HDMI®
   Your HD cable box or HD satellite receiver may have a DVI connection. This will be connected to the HDMI jack on the TV using an HDMI cable and an HDMI to DVI converter. DVI carries digital video only.

4. Component Video Input
   ColorStream™ HD component may also be used to receive HDTV. Use if no HDMI connection is available. There are three jacks color-coded with red-green-blue on the back of the TV and HD cable box or HD satellite receiver. This connection will require a separate analog audio connection (use the red and white audio connections).

Initial Setup

You must select a Language, either Home or Store mode, before you can exit out of the Setup Menu. The EXIT button will not function until these selections have been made.

1. Menu Language
   Select a language.

2. Time Zone
   Select a time zone. Press ENTER.

3. Store / Home Mode
   Select Store or Home Mode. Press ENTER.

4. ANT/CABLE
   Select Antenna or Cable. Press ENTER.

Navigating the menu system

You can use the buttons on the remote control to access and navigate your TV’s on-screen menu system.

• Press MENU to open the menu system.
• When a menu is opened, use the arrow buttons (△ ◄ ◄) on the remote control, to move in the corresponding direction in the menu.
• Press ENTER to save your menu settings or select a highlighted item. (A highlighted menu item appears in a different color in the menu).
• All menus close automatically if you do not make a selection within 60 seconds.
• To close a menu instantly, press EXIT.

Quick Tour

Need Help?

Most problems are easy to correct. Save time with one of these simple solutions.

Consult the electronic User’s Guide
L1400 series: To browse the electronic user’s guide please visit support.toshiba.com Type in your product model or serial number, press Go, and then click Manuals & Specs.
